Status of activities at INFN

• Modules Calibrations
  – CAL: got latest soft from NRL, now taking fresh data and going through the loop again
  – TKR: repeat the loop with fresh data
  – Taking long run with AD and ext trigger

• DAQ
  – Time-stamp added to AD stream to check event sync
  – CU-DAQ GUI being configured a la end-to-end, i.e. no configurations needed)

• Sim/Recon
  – AD digi-recon package in CVS now being split into proper digi and recon parts (with Richard, Leon, Heather)
    • Implementing AD-stream to digi (towards digi-merge)
  – Implemented realistic tagger geometry into G4 PS simulation
    • Checking Sandro’s results
