

LOST

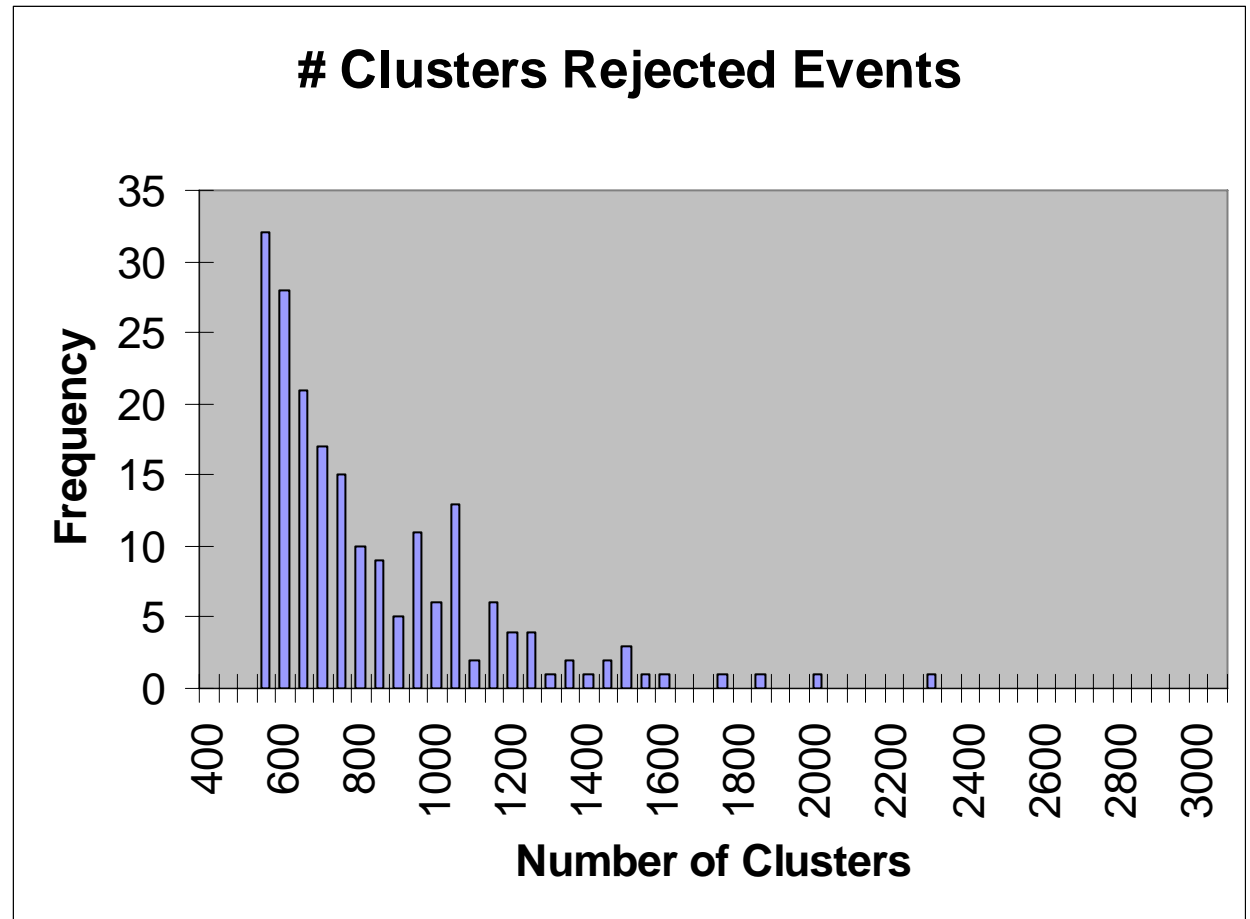

(events in DC2 runs)

Distribution of Rejected Events by number of Tracker Clusters

These events are rejected after the Tracker clustering stage with a cut on the total number of Tracker clusters in the event.

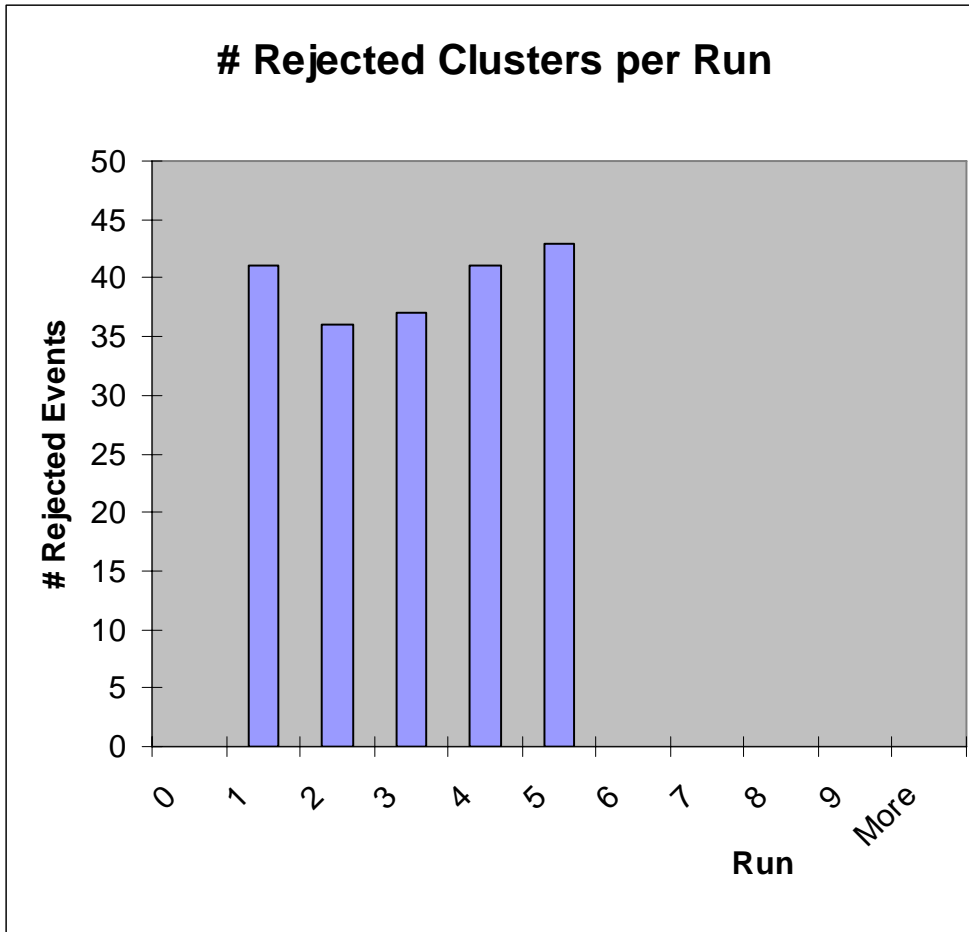

Cut is currently set to reject events with more than 500 clusters.

Plot suggests we are cutting at the edge of the main cluster distribution...

Events Rejected per Run

(a small sampling of the log files)

Losing some 40 events per 10000 event run.

Distribution of Tracker Clusters

(from modified SystemTests – one run)
