

Instrument Analysis Meeting 03.25.2005

- All data processing software (EngineeringModel release, pipeline scripts,) are under **CCB!**
 - Web link from the Agenda to CCB guidelines page
- End2End runs:
 - Two series of test runs to verify the configuration
 - Started 1h runs on Saturday, continuing today
- David Smith:
 - Difference between measured CALposition and prediction from the TKR extrapolation:
 - Middle 4 logs of last layer: Huge differences
 - Under investigation
- Xin Chen:
 - Occupancy in electronics space: Data vs MC
 - Discrepancies in top trays may point to MC simulation does not have the correct particle spectrum.
 - Mapping code is in CVS: `svac/EngineeringModelRoot`
 - C++ code, not Root macro – see IA email
- Event ID: Online will switch to 32 bit number – avoids wraparound
