

System Tests – DC2

- We found and fixed a line of code in the systests scripts that had been preventing us from using the updated version of oracle. This means that we can now automatically run the systests to completion (for the past few months there has been a manual step needed at the end).

Cal Transverse RMS

VerticalProton1GeV

(verticalMuon1GeV looks similar)

Why has this changed?

This was studied by Tracy who found that a bug had been introduced into CalRecon. This has not yet been fixed in v8r0 or v8r1.
