

Glast GUI software Installer

- Now works on Linux and Windows
 - Doesn't access MySQL directly
 - Works around firewall problem mentioned by some users at collaboration meetings
- Linux version exactly the same as Windows
 - Uses gtar instead of zip internally
 - Needs some people to test on Linux
 - Needs some documentation
 - In particular users need to set up Java Web Start
 - Browser will prompt for application to use to open JNLP file, just select javaws (in same bin directory as java)
 - Or start manually:
 - javaws <http://glast-ground.slac.stanford.edu/Installer/installer.inlp>
- Home Page:
 - <http://glast-ground.slac.stanford.edu/Installer/>

Data Server/Catalog

- Data Catalog now working
 - Reading XML files directly used too much memory
 - Now changed to use Hibernate to import XML into Oracle
 - A couple of problems still to fix before making it public
- Working on interface to pruner/peeler
 - Using Tom's latest enhancements to accept list of files
 - Will soon merge in Igor's pruner enhancements to store users job history, previous settings
 - Will add "expert" functionality to pruner as suggested by Tom

Glast Data Catalog (version 1.0)
