Pipeline 2

- **Detailed status update** from the developers.
- **Highlights**: 
  - Core server, SQL schema, XML schema/uploader, stored procedures functional.
  - Server can execute pipelines locally.
- **Yet to come**: 
  - Batch interface, data catalog interface
  - Complete handling of conditionals and variables in pipelines.
  - Web interface (adaptation of existing PFE)
- Follow [development progress](#) in Confluence.
