Database Integration

- Confluence Pages describing the various databases at [https://confluence.slac.stanford.edu/display/ISOC/Databases](https://confluence.slac.stanford.edu/display/ISOC/Databases)
- Series of meetings scheduled among database “owners” to refine content of individual table-sets by the end of the month.
- Follow-on effort to look at ways to aggregate “related” data across table-sets, for example:
  - HSK trending parameters for a given run
  - Event rates vs. orbit position
