Data Handling Working Group

- Database Integration
  - Confluence Pages describing the various databases at https://confluence.slac.stanford.edu/display/ISOC/Databases
  - Discussions progressing – covered data-quality monitoring, calibration & HSK trending, pointing history in most recent meeting.

- Logging
  - Investigating “prior art” from other experiments, e.g. the EPICS “CMLOG” module.

- Pipeline-2
  - DB tables and Java interface classes defined.
  - Initial XML loader implemented
  - Pipeline server is running local (non-batch) task-chains
  - Web Interface, batch interface, data-catalog interface to come.
