Data Handling Working Group

- DH group met with SLAC Oracle experts.
  - Learned about web-based DB performance-monitoring tools
  - Discussed DB replication / fail-over capabilities
  - Detailed summary in Confluence.

- Pipeline II
  - Tony has made a first-cut web interface that operates on the new schema.
  - Dan is working on handling conditional branching and user-defined variables in task definitions, as well as task dependencies.

- Beam-Test data delivery:
  - Installed FASTCopy on a machine at CERN and demonstrated transfers to SLAC.
  - Attempting to characterize the network link and maximize throughput.
