DAQ/Crates

- **Since last month**
  - **SIU11 (CPU14), EPU00 (CPU17), EPU03 (CPU18) were all removed from LAT, CPu was inspected, crate reassembled, vibrated, TV'ed, reassembled on LAT, tested ok**
    - **No issues with any of the above CPU's in respect to EEPROM underfill**

- **Two spare crate assembled with CPU12 and CPU31**
  - **One vibrated, tested, is now in TV until Sunday**
  - **Second spare assembled, in vibration today**
- **Spare GASU still in harness assembly, expected 4/7, followed by flight-acceptance testing**
- **Harness: all DAQ flight cables installed on LAT**
