650-926-2469 650-926-2553

Last Month's Accomplishments (1 of 4)

- **Management**
 - Supported environmental test planning.
 - Tracking hardware shortages for LAT integration.
 - TKR Delivery
 - ELX Boxes
- **IFCT**
 - Completed 6 Tower Tests
 - Integrated two additional towers
 - Completed 8 Tower Tests
 - Completed receiving tests for all CAL units.
 - Supported ACD Receiving and tests at SLAC
 - Completed Grid 2 Assembly for SLT
 - Completed TPS replacement in the grid.

Last Month's Accomplishments (2 of 4)

- **Online**
 - **Provided updated schema's and test software updates to support 8 tower and ACD tests.**
 - **Completed parallelized test scripts to reduce multiple tower test duration**
 - **LATTE 4.10.1 about to be released for I&T Tower + ACD testing**
 - **ACD scripts received and integrated with the I&T script base (CAL, TKR, TRG, System)**
 - **Script changes necessitated due to different power model and housekeeping from that used during ACD construction**
 - **End-to-End scripts updated for ACD-related parameters**
 - **Modified scripts validated against Qual unit, used on Flight unit**

Last Month's Accomplishments (3 of 4)

- **Online (cont'd)**
 - **LICOS work is well underway**
 - Supported accelerated FSW implementation planning
 - Supported LAT configuration TIM
 - Finalizing architecture
 - Testing of interaction with the VSC and its software interface is ongoing
 - User's Manual in progress
 - **Mobile rack**
 - 6 computers, 1 switch, 1 firewall received and set up
 - Linux operating system chosen
 - Installation process demonstrated
 - Demonstrated LATTE and E-Logbook operation
 - Finalizing and documenting system configuration

Last Month's Accomplishments (4 of 4)

- **SVAC**
 - **Workshop 5 (Aug 29) was successful**
 - **First results from initial MC simulations with ACD integrated with 8 towers**
 - **Comprehensive Review of TKR CC FIFO full events for all data taken up to 8 towers**
 - **Search for photon candidates in cosmic ray data from 2, 4 and 6 towers**
 - **Overview of trending of TKR and CAL calibrations**
 - **fixed bugs in offline calibrations**
 - **First memo to document the work produced so far in LAT DOCS**
 - **2 other memos in progress**
 - **Overall summary paper in progress**
 - » **More to come by the end of the year**
 - **Two workshops planned to guide us through LAT integration**
 - **Workshop 6 (end of the year)**
 - **Workshop 7 (early next year)**
 - **See the instrument Analysis Web Page for details**

Goals for Workshop 5 (Aug 29)

- Study MC generated events with ACD + 8 towers **(Done)**
 - Need to get familiar with ACD variables
 - Start thinking how we will set up tests using ROIs to do analysis that we could not do so far
 - To support I&T test planning activities
- Present a list of distributions that capture geometrical dependencies since we can not spend too much time when the full LAT is assembled to learn all that **(Postponed to the next workshop)**
 - These will change as we add more towers
- Show trending results for calibrations (function of time and per tower) **(Done)**
 - Would like to have a comprehensive presentation from both TKR and CAL
- Alignment **(Partially Done)**
 - Produce inter and intra-tower results using SAS reconstruction in its native framework
- Educate collaborators to connect science with housekeeping data **(Postponed to the next workshop)**
 - Only SVAC group does that right now

FIFO Event Error Summary

Conclusion from Giovanni Petri, student from Pisa working with Eduardo

Conclusions

1. The TKR works (poor me...) too well!!
 - FIFO errors are no mystery anymore!!
 - We know how to characterize AND understand them!
 - Rates are low:
 - 1 (lonely) bad guy every 100 thousands!!!!
 - No influence on other events!!!
2. Bad Events are consistent with showers
3. High energy photons MC needs to be further studied
 - What about reducing lower layers buffer bandwidth to improve recon??

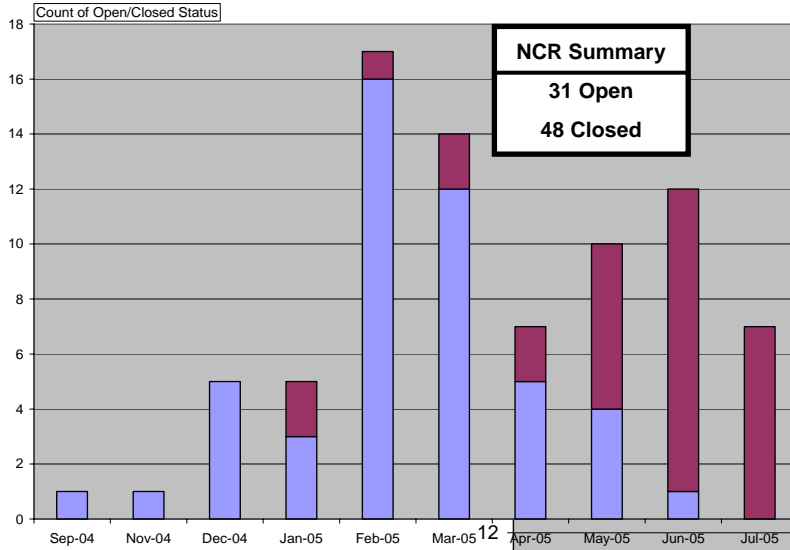

Presented at the SVAC Workshop. Charts available at:

http://www-qlast.siac.stanford.edu/IntegrationTest/SVAC/Instrument_Analysis/Workshop-5/Talks/GiovanniWorkshop29AugustWithTitle.ppt

I&T NCRs by Month Open/Closed Status

Previous Month

Current Status

Month NCR Opened

I&T Activities

Eight tower tests complete

ACD receiving at SLAC

ACD Mock-up for lift fixture fit-check

4.1.9 - Integration and Test

EMI Skirt Fit-check Grid 2

Upcoming I&T Events

- STR #16 Parallelized Test Scripts ECD 7/29 (Complete)
- TKR Hand-off to I&T ECD 7/28 (Complete)
- 8 Tower Integration ECD 8/12 (Complete)
- 8 Tower Tests ECD 8/26 (Complete)
- ACD Receiving ECD 8/12 (Complete)
- ACD I&T Receiving Tests ECD 9/1
- Flight like GASU delivery ECD 9/2
- Shear plate and cable tray installation for 8 towers ECD 9/7
- STR #34 CAL re-trigger characterization
- TKR (2) Receiving ECD 9/9
- ACD Integration Readiness Review 9/9 (9/12)
- ACD Installation with 8 towers ECD ~~9/5~~ 9/13

ACD Integration Status

- I&T ACD Receiving tests ECD 9/2
- ACD lift fixture in work
 - Proof test ECD 9/7
- Additional ACD off tests identified by ELX (STR 19) for ACD Clock Phase Bit Determination
- ACD with 8 Towers Test Plan **Complete**
 - Pretest Review ECD 9/8
- INT Scripts for ACD w/ 8 Towers **Complete**
- FSW is working toward 10/3.
 - FSW architecture supports 8 tower tests without impact to code.
- ACD Integration Procedure in work ECD 9/7

Online Plan

- **Transition to LICOS**
 - **Functionality is similar but procedures will need to be modified.**
 - User interface (even with different operating system) is very similar between LICOS and LATTE => minimal retraining required
 - **Configuration and output products are different**
 - Configuration snapshots replaced with FSW confirmation
 - LDF definition augmented
 - **Commanding portion of scripts must be replaced with telecommands.**
 - Some scripts will no longer be needed in FSW realm, however some new scripts will be required.
 - Parallelized analysis scripts will be modified for LDF changes and bookkeeping, but otherwise will be about the same
 - **MOOT/MOOD (ISOC configuration tool) will require modifications at a later date.**

Early ACD Integration Risks and Concerns

- Delay in science data format definition from FSW.
 - Expected any day now.
- Delay in completion of science data handling by VSC/FSW.
 - Needed ASAP.
 - Responsibility split between FSW, ELX and Online.
- Missing functionality in LCI (FSW's LAT Charge Injection package) that prevent conversion of LATTE scripts.
 - Need to assess whether ACD scripts will fit in the paradigm.
- Flight crates (SIU/EPU) don't contain ground-only debugging interfaces.
 - No ethernet, no serial line connection.
 - Proposal to run LATTE via the VSC to test Flight SIU/EPU crates
 - Requires modifications to LATTE for ELX to pass messages over 1553 for ELX flight hardware tests.
 - Anticipated to be a minimum 1 week job.

I&T Detail Schedule (1 of 3)

488	Flight Software Validation	5 days	12/5/05	12/12/05	[Gantt bar from 12/5/05 to 12/12/05]																											
489	LAT Functional Test	15 days	12/12/05	12/22/05	[Gantt bar from 12/12/05 to 12/22/05]																											
490	E2E Tests	15 days	12/22/05	1/7/06	[Gantt bar from 12/22/05 to 1/7/06]																											
491	Low Level Characterization/MC Verification/Fir	15 days	1/7/06	1/17/06	[Gantt bar from 1/7/06 to 1/17/06]																											
492	Pack & Ship to NRL	5 days	1/17/06	1/24/06	[Gantt bar from 1/17/06 to 1/24/06]																											

Issues & Concerns

ISSUES

- Availability of flight hardware.
 - SIU & EPU Deliveries
 - TKR Deliveries

CONCERNS

FSW availability for Early ACD Integration tests

I&T Resources for ACD and TKR tower tests in parallel

**Cost/Schedule Reports for

Level 3 Milestones
 Baseline Variance (Organized by Subsystem)

LT-DZ: Baseline Variance
 FL-D4: AV: Level 3 Milestones
 Report #10
 Sheet 11

Milestone Variance Explanation

- **Schedule Impact**
 - LAT shipment to NRL delayed until the end of January 06
- **Cost Impact**
 - Additional labor costs for weekend work to minimize impact of late hardware deliveries.
- **Corrective Action**
 - Schedule weekend work for integration and test as appropriate.

Cost Report

Cost Variance Explanation

- **Why overrun/underrun?**
 - **Underrun caused by operating under planned headcount.**
 - **Minimized impact of late hardware deliveries.**
- **What will be done to correct?**
 - **Adding staff as required.**

FTE Report

(DOE/NASA-funded only)

FTE Variance Explanation

- **Why overrun/underrun?**
 - **Staffing is below plan due to employee voluntary terminations.**
- **What is the impact?**
 - **None**
- **What will be done to correct?**
 - **Adding staff as required.**
