REQUEST FOR ACTION (RFA) FORM

GLAST LAT Project
ISOC Peer Review
March 2, 2004

Action Item #   18

Presentation Section/Subject Area: Automation

SPECIFIC REQUEST:

Specify plans and requirements for automation of operations software, and describe the software design for how the automation needs will be met.

REASON/COMMENT:

Operations software will need to be automated. This will be of increasing importance at later stages in the mission lifetime as staff reductions occur. Unless software is designed from the start to be automated, then it can be time consuming etc. to automate ops. software. (e.g. based on XTE experience). Software designed for I&T may not be well suited for long-term automatic use without ISOC input. It was not clear in the review that a system-level software design exists that addresses automaton.
